Pros

- ✓ Revenue growing at above 15% CAGR over 5 years reflects strong business momentum
- ✓ Operating profit margin above 25% indicates strong pricing power and cost discipline

Cons

- ✗ Debt-to-equity ratio of 6.60 is elevated for a non-financial company and warrants monitoring
- ✗ Gross debt exceeding 3 times EBITDA is a high leverage ratio and limits financial flexibility
- ✗ Return on capital employed below 10% suggests the business is not generating sufficient returns on invested capital
