Revenue vs Net Profit (₹ Cr)

ROE vs ROCE Trend (%)

Pros

✓ Return on equity of 1.2% reflects the company's current capital efficiency level

Cons

- ✗ Rising debt-to-equity ratio over 3 years suggests increasing financial leverage risk
- ✗ Gross debt exceeding 3 times EBITDA is a high leverage ratio and limits financial flexibility
- ✗ Revenue growing at below 5% over 5 years lags inflation and suggests limited business momentum
- ✗ Return on capital employed below 10% suggests the business is not generating sufficient returns on invested capital

Capital Allocation: External Funding
